## **Neopost Introduces Industry's Most Technologically Advanced Tabletop Tabbing System**

### *Unique Multiple-Side Tabbers Offer Unparalleled Productivity*

**MILFORD, CT, January 25, 2010** – The new Neopost TA-25 and Hasler HT25 tabletop tabbing systems from [Neopost](#) USA feature production capabilities offered by no other tabletop tabbing system on the market – the ability to apply tabs simultaneously to both the top and side of a mailpiece, and then to switch to a configuration that can apply tabs on opposite sides of the same piece (side-to-side tabbing) in a single pass.

Tabbing is a cost-effective solution when sending mail that doesn't require the use of envelopes. It is a USPS® requirement for automation discounts for non-envelope, self-mailers and booklets. The Neopost TA-25 and Hasler HT25 tabbing systems save you time and money, while helping you project a professional image. As inexpensive alternatives to envelopes, they seal newsletters, brochures and documents with adhesive or wafer tabs. Their simple operation enables anyone in the office to operate them and complete any job, big or small, quickly and easily.

### **Enhance Operational Efficiency and Improve Mail Quality**

With tabbing speeds of up to 25,000 per hour (for single tabbing tri-folds), the new tabbers are fast and efficient. They also make multiple-side booklet tabbing an easy task: one fixed tab head can apply tabs along an open edge and the other tab head is able to switch from side-tabbing to front tabbing or can even apply USPS® pressure sensitive roll stamps. The Neopost TA-25 and Hasler HT25 apply clear, translucent or paper tabs (including the new 1.5" tabs for letter-size booklets) to a variety of material sizes - up to 11" x 15" and with a thickness up to 1/4".

Whether side-to-side tabbing or single tabbing, these Neopost multi-side tabber/stamp affixers will make your job easier, more productive and more profitable. Their heavy-duty aluminum and steel construction guarantees you years of reliable, high performance use.
